ADDENDUM NUMBER TWO (2)

Project: Ridgeland City Hall
City of Ridgeland
PN: 14084

FROM: Dean and Dean/Associates Architects, P.A.
4400 Old Canton Road, Suite 200
Jackson, MS 39211
(601) 939-7717

The following additions, changes, clarifications and/or substitutions to the Project Drawings as indicated, are hereby made a part of the Contract Documents. Acknowledge receipt of this Addendum by inserting its number and date in the Proposal Form where indicated.

Clarifications:

Item #1: Section 004100 - Bid Form, Section 1.05 Offer, as follows:

1. If you as a prime contractor are not bidding on a particular portion of the work (i.e. Prime General not bidding on Electrical or Mechanical Package) then leave that line item on the Bid Form blank.

Item #2: Section 004100 - Bid Form, Section 1.08 Unit Prices For Drilled Piers, Sub-Section B and C, as follows:

1. If a particular shaft diameter is NOT in the drawings, then leave that line item on the Bid Form blank.

General Questions and Clarifications:

- Is this project sales tax exempt? If the project is sales tax exempt, can the government provide a sales tax exemption certificate:
  - This project is not tax exempt.

- Will the City provide comprehensive written badging requirements for the project if badging is required?
  - Badging is not required.

- Where will the designated parking area be for workers accessing the construction site?
  - Northside of laydown area until parking lots are available. Refer to Civil drawings.

- Will the City accept the use of the industry leading Procore Project Management software as the primary submittal and data tracking tool for this project?
  - Construction Manager controls submittal process. See specs.

- Does the City have a fire alarm servicer that they currently work with? What is the name and contact information of the person or persons that will need to be coordinated with for security and fire alarm and suppression systems work and/or disruptions?
  - N/A

- Does the City currently have a 3rd party testing service for those items requiring testing or is the contractor free to locate and hire applicable testing firms?
    - Hired by General Works Prime subject to City approval.

- Who is responsible for the utility locations?
    - Shown on drawings

- Due to current potentially significant tariffs being placed on the importation of building materials such as wood or steel by the current Presidential Executive Branch, if a tariff is placed after bid time and before award, will the government consider a price escalation on a contract value for products such as steel or wood should the executive branch levee tariffs effecting such materials? Most of these materials would still have been Buy American compliant as the tariffs would increase pricing on all steel or wood materials, regardless of origin.
    - No price escalations will be considered or accepted.

- Can the sign-in sheet for the site visit be published prior to the bid date?
    - There has been no organized site visit with a sign-in sheet.

- Who is responsible for the HVAC controls in the City's buildings and who is the point of contact?
    - HVAC Prime will handle controls and coordination.

- Does this project require a dedicated SSHO and a dedicated QCM or can these positions be dual hatted?
    - Not required.

- Are Divisions 27 and 28 to be bid as part of the Electrical Prime Contractor's work?
    - Yes.

- Is the transformer pad to be constructed by the Electrical Prime or the General Works Prime?
    - Transformer concrete pad is to be constructed by the General Works Prime. Coordinate conduit locations with Electrical Prime.

EQUIPMENT POWER CONNECTION REMARKS:

1.	FINAL CONNECTION USING FLEXIBLE CONDUIT	6.	UNIT ON ROOF.
2.	FINAL CONNECTION USING LIQUID TIGHT CONDUIT.	7.	WALL MOUNTED.
3.	INSTALL MAGNETIC STARTER AND DISCONNECT SWITCH ADJACENT TO AND CONNECT THROUGH MAGNETIC STARTER FURNISHED UNDER DIV. 15	8.	DISCONNECT INTEGRAL WITH UNIT.
4.	RAINTIGHT DISCONNECT SWITCH.	9.	INDOOR UNITS SHALL BE SERVED FROM OUTDOOR UNITS
5.	MOUNT ABOVE CEILING.	10.	SEE ELEVATOR NOTES BELOW.

TYPICAL ELEVATOR NOTES:

1. MAIN CONNECTION TO TERMINALS OF ELEVATOR CONTROLLER SHALL BE THROUGH A BRANCH CIRCUIT PROTECTIVE DEVICE (BCPD) IN THE FORM OF A FUSED DISCONNECT SWITCH OR A 3 POLE CIRCUIT BREAKER, IN NEMA 1 ENCLOSURE, LOCK–OUT TYPE, NOT AUTOMATICALLY OPENED BY FIRE ALARM SYSTEM. THE BCPD SHALL BE VISIBLE FROM THE CONTROLLER (IF THE BUILDING IS SPRINKLED, SEE NOTE 7). NON–FLEXIBLE CONDUIT SHALL BE PROVIDED AND SHALL NOT BE USED AS THE GROUNDING SYSTEM. BREAKER SERVING ELEVATOR CONTROLLER SHALL BE GFI TYPE.
2. PROVIDE A SEPARATE BRANCH CIRCUIT FOR CAR LIGHTS, RECEPTACLE(S), AUXILIARY LIGHTING POWER SOURCE AND VENTILATION ON EACH ELEVATOR CAR. IN ADDITION PROVIDE A DEDICATED BRANCH CIRCUIT FOR CAR AIR CONDITION AND HEATING UNITS ON EACH CAR. THE OVERCURRENT DEVICE PROTECTING EACH OF THE AFOREMENTIONED BRANCH CIRCUITS SHALL BE LOCATED IN THE ELEVATOR EQUIPMENT ROOM SERVING THE ELEVATOR. COORDINATE EQUIPMENT INSTALLATIONS WITH THE ELEVATOR CONTRACTOR.
3. PROVIDE GFI RECEPTACLE IN ELEVATOR EQUIPMENT ROOM.
4. PROVIDE TELEPHONE OUTLET IN ELEVATOR EQUIPMENT ROOM.
5. SMOKE DETECTORS SHALL BE IN ALL ELEVATOR LOBBIES AND MACHINE ROOM (SMOKE DETECTORS SHALL NOT BE SELF–RESETTING). PROVIDE A THERMAL DETECTOR IN MACHINE ROOM CONNECTED PER NOTE #7. PROVIDE A HEAT AND SMOKE DETECTOR IN ELEVATOR PIT(S)
6. ELEVATOR PIT SHALL HAVE GUARDED PIT LIGHT WITH SWITCH ADJACENT TO PIT LADDER, AND 120 VOLT NON–GFI RECEPTACLE. THESE DEVICES SHALL BE LOCATED ACCORDING TO THE ELEVATOR CONTRACTOR.
7. IF THE BUILDING IS SPRINKLED, FOR A BCPD USE A 4 POLE FUSED DISCONNECT SWITCH IN NEMA 1 ENCLOSURE. THE 4TH POLE TELLS THE ELEVATOR CONTROLLER THAT THERE HAS NOT BEEN A POWER FAILURE, JUST THAT POWER HAS BEEN DISCONNECTED. THE BCPD SHALL BE FURNISHED WITH TWO CONTACTORS, ONE (1) NORMALLY OPEN AND ONE (1) NORMALLY CLOSED. THE BCPD SHALL BE VISIBLE FROM THE CONTROLLER. PROVIDE THERMAL DETECTOR IN THE ELEVATOR EQUIPMENT ROOM WITH CONTROL WIRING TO AUTOMATICALLY DISCONNECT POWER SUPPLY PRIOR TO APPLICATION OF WATER IN THE HOISTWAY OR THE ELEVATOR EQUIPMENT ROOM. THIS DEVICE SHALL NOT BE SELF–RESETTING.
8. FOR ELEVATORS TO OPERATE ON EMERGENCY POWER, PROVIDE 3–#14 WIRES FROM AUTOMATIC TRANSFER SWITCH AUXILIARY DRY CONTACTS TO THE TERMINALS OF ELEVATOR CONTROLLER THROUGH THE BCPD.
9. PROVIDE SHUNT TRIP DEVICE ON EACH ELEVATOR DISCONNECT.
